

testing::Test

```
classDiagram
    class testingTest["testing::Test"]
    class AuthenticateLoginTest
    AuthenticateLoginTest --|> testingTest
```

The diagram illustrates an inheritance relationship. At the bottom is the 'AuthenticateLoginTest' class, which is shaded gray and contains two methods: '# SetUp()' and '# TearDown()'. A blue arrow with an open triangular head points from this class to the 'testing::Test' class at the top. The 'testing::Test' class is represented by a white box with a black border and is divided into three horizontal sections, with the name in the top section.

AuthenticateLoginTest

#    SetUp()

#    TearDown()
